

FULLSOLUTIONS

Company Presentation

The solutions your company needs

Full Solutions supplies parts, equipment and services for industry at large. Our extensive portfolio covers the main product lines for maintenance and repair of platforms, vessels and industrial facilities, solving issues quickly and efficiently so your operations never stop.

Instrumentation

Level, pressure, flow and temperature.

Fire & Gas Detection

Detectors, panels, beacons and alarms.

Hazardous Area Electrical

Lighting, cable glands, telephony and Ex enclosures.

Valves & Actuation

Ball, gate and control valves with actuators.

Pumps

Centrifugal, dosing and transfer units.

Filtration & Separation

Elements, coalescers and vacuum filters.

HVAC

Ventilation, cooling and exhaust for offshore.

Tools & Test Equipment

Calibration, measurement and MRO supply.

Authorized representation

Factory-appointed supply, with original parts, full warranty and traceability.

Engineering services

Application engineering, photometric studies, F&G commissioning and Ex inspection.

Classified areas

Equipment and documentation to ATEX, IECEx and INMETRO requirements.

Built for demanding industries

Supplying operators, shipyards and EPC contractors across Brazil, the Americas and Europe.

01

Oil & Gas

Platforms, refineries and offshore operations.

02

Naval

Vessels, ports and marine systems.

03

Energy

Power generation and industrial facilities.

04

Mining

Open-pit, underground and processing plants.

A Footprint that moves fast

Strategically positioned to act quickly, wherever your operation is.

Our Competitive Advantages

01 Three hubs, one operation

Brazil, US and UK offices run as a single structure: local stock in Brazil, direct sourcing from US and European manufacturers, and import routing decided upstream.

→ Shorter lead times without holding inventory of your own.

02 Inside a supply chain you already trust

Active supplier to Petrobras, PRIO, MODEC, Equinor, Vale and major EPC contractors, with vendor registrations and a compliance record already in place.

→ No onboarding risk on a critical package.

03 Import and compliance handled in-house

Our own team runs import documentation, NCM classification, INMETRO support, end-user certificates and customs clearance — including Invest-ES and Compet-ES benefits.

→ Landed cost and deadlines you can commit to.

04 Technical sales, not order-taking

A team fluent in instrumentation, valves and automation supports the full RFQ-to-delivery cycle, with application engineering where the spec is open.

→ Fewer requotes and fewer wrong parts on site.

Direct Access to Global Manufacturers

Full Solutions represents leading manufacturers across instrumentation, filtration, measurement and automation — giving clients a single import and commercial channel.

Level and pressure instrumentation

Industrial filtration and separation

Authorized representative in Brazil

Full Hubbell portfolio for harsh and hazardous areas

Industrial telephony and PAGA for classified areas

Lighting for classified areas

Cable glands and Ex entries

Explosion-proof electrical equipment

Trusted by industry leaders
